REMONDIS®
WORKING FOR THE FUTURE

Simpler Recycling

What you need to know...

What is changing?

The law is changing in England which will require you/ your workplace to recycle a core set of recyclable materials.

When is it changing?

31st March 2025- if you have 10 or more full time employees (Simpler Recycling should already be put in place).

31st March 2027- if you have fewer than 10 full time employees in total across all of your premises.

Why are you making these changes?

We want to move to a future where we keep our resources in use for longer, and reduce waste to landfill. Increased recycling and separately collecting food waste will help to reduce carbon emissions associated with waste and will support our path to net zero.

What will you need to recycle?

You will need to recycle the following materials. Your waste will tell you which materials can go in the same bin for collection.

- Food waste
- Paper and card
- Plastic bottles, pots, tubs/ trays, and cartons
- Metal tins and cans, foil, and empty aerosols
- Glass bottles and jars
- Plastic films (from 2027)

Who needs to act?

All workplaces in England, including:

- Businesses
- Care Homes
- Educational establishments
- Healthcare establishments
- etc

What should you do now?

- Speak to our sales team to check if your current services meet the requirements or if you need to make any changes.
- Tell your staff about any new processes and how to recycle correctly. This might include signage on bins.
- Decide how frequently your recycling and food waste collections should.
